ABOUT

The film VOYAGERS is a short animated tribute to the NASA Voyager space program. The film takes a poetic approach to the literal history of the mission by fusing the sounds, images, and archival footage associated with the crafts. The short film serves as a reminder of our accomplishments in space exploration by focusing on what we have managed to achieve through the ambitious Voyager program.

The film also showcases the images and sounds of our solar system through the real photographs and plasma frequencies received by the voyager crafts.
